

| TABLE OF CONTENTS | | PAGES |
|--|--|--------------|
| Session I. The Pollinator Initiatives | | 17 |
| 1 | Food and Agriculture Organization of the United Nations. "Conservation and Management of Pollinators for Sustainable Agriculture - The International Response" | 19 |
| 2 | Vera Lucia Imperatriz Fonseca and Braulio Ferreira Souza Dias "Brazilian Pollinators Initiative" | 27 |
| 3 | Michael Ruggiero, Stephen Buchmann and Laurie Adams. "The North American Pollinator Initiative" | 35 |
| 4 | Simon Potts (ed.). "European Pollinator Initiative (EPI): Assessing the Risks of Pollinator Loss" | 43 |
| 5 | Uma Partap. "An Overview of Pollinators Research and Development in the Hindu Kush-Himalayan Region" | 57 |
| 6 | Connal Eardley, Barbara Gemmill, Peter Kwapong and Wanja Kinuthia. "The African Pollinator Initiative" | 67 |
| Session II. Monitoring and Population Dynamics of Solitary Bees | | 71 |
| 7 | Fernando A. Silveira. "Monitoring Pollinating Wild Bees" | 73 |
| 8 | Carlos Alberto Garófalo, Celso Feitosa Martins and Isabel Alves-dos-Santos. "The Brazilian Solitary Bee Species Caught in Trap Nests" | 77 |
| 9 | Claudia Mohra, Martin Fellendorf and Robert J. Paxton. "The Population Dynamics and Genetics of Solitary Bees: A European Case Study, <i>Andrena vaga</i> (Hymenoptera, Andrenidae)" | 85 |
| 10 | David W. Roubik. "Long-term Studies of Solitary Bees: What The Orchid Bees are Telling Us" | 97 |
| Session III. Conservation and Economic Valuation of Solitary Bee Pollination Services | | 105 |
| 11 | Gordon W. Frankie and S. Bradleigh Vinson. "Restoring Native Bee Pollinators: A Case History in Costa Rica" | 107 |

| | | |
|---|---|-----|
| 12 | Claire Kremen. "Pollination Services and Community Composition: Does it Depend on Diversity, Abundance, Biomass, or Species Traits?" | 115 |
| 13 | Adam G. Drucker. "Economic Valuation of Bee Pollination Services: Implications for Farm Management and Policy" | 125 |
| 14 | Hayo H.W. Velthuis and Adriaan van Doorn. "The Breeding, Commercialization and Economic Value of Bumblebees" | 135 |
| Session IV. Rearing and Managing Solitary Bees: <i>Osmia</i> and <i>Megachile</i> | | 151 |
| 15 | Jordi Bosch and William P. Kemp. "The Life Cycle of <i>Osmia lignaria</i> : Implications for Rearing Populations" | 153 |
| 16 | Antonio Felicioli, Miloje Krunić and Mauro Pinzauti. "Rearing and Using <i>Osmia</i> Bees for Crop Pollination: A Help from a Molecular Approach" | 161 |
| 17 | Anthony Raw. "Ambivalence Over <i>Megachile</i> " | 175 |
| 18 | Rogel Villanueva-Gutiérrez and David W. Roubik. "Pollen Sources of Long-Tongued Solitary Bees (Megachilidae) in the Biosphere Reserve of Quintana Roo, Mexico" | 185 |
| Session V. Solitary Bees in Agricultural Systems: <i>Centris</i> and <i>Xylocopa</i> | | 191 |
| 19 | Breno M. Freitas and Julio Otávio P. Pereira. "Crop Consortium to Improve Pollination: Can West Indian Cherry (<i>Malpighia emarginata</i>) Attract <i>Centris</i> Bees to Pollinate Cashew (<i>Anacardium occidentale</i>)?" | 193 |
| 20 | Stephen L. Buchmann. "Aspects of Centridine Biology (<i>Centris</i> spp.) Importance for Pollination, and Use of <i>Xylocopa</i> spp. as Greenhouse Pollinators of Tomatoes and Other Crops" | 203 |
| 21 | Katja Hogendoorn. "On Promoting Solitary Bee Species for Use as Crop Pollinators in Greenhouses" | 213 |

| | |
|---|-----|
| Session VI. Wild Plant Pollination Systems Involving Solitary Bees | 223 |
| 22 Christian Westerkamp. “Ricochet Pollination in Cassias – and How Bees Explain Enantiostyly” | 225 |
| 23 Clemens Schindwein. “Are Oligolectic Bees Always the Most Effective Pollinators?” | 231 |
| 24 Márcia Motta Maués, Milene Silva de Souza and Milton Kanashiro. “The Importance of Solitary Bees on the Reproductive Biology of Timber Trees at the Tapajós National Forest, Brazil” | 241 |
| 25 Isabel Cristina Machado. “Oil-Collecting Bees and Related Plants: A Review of the Studies in the Last Twenty Years and Case Histories of Plants Occurring in Ne Brazil” | 255 |
